

## Sandra L Osorio Logic Model 1/11/14

**Problem Statement:** What is the problem you are trying to solve?

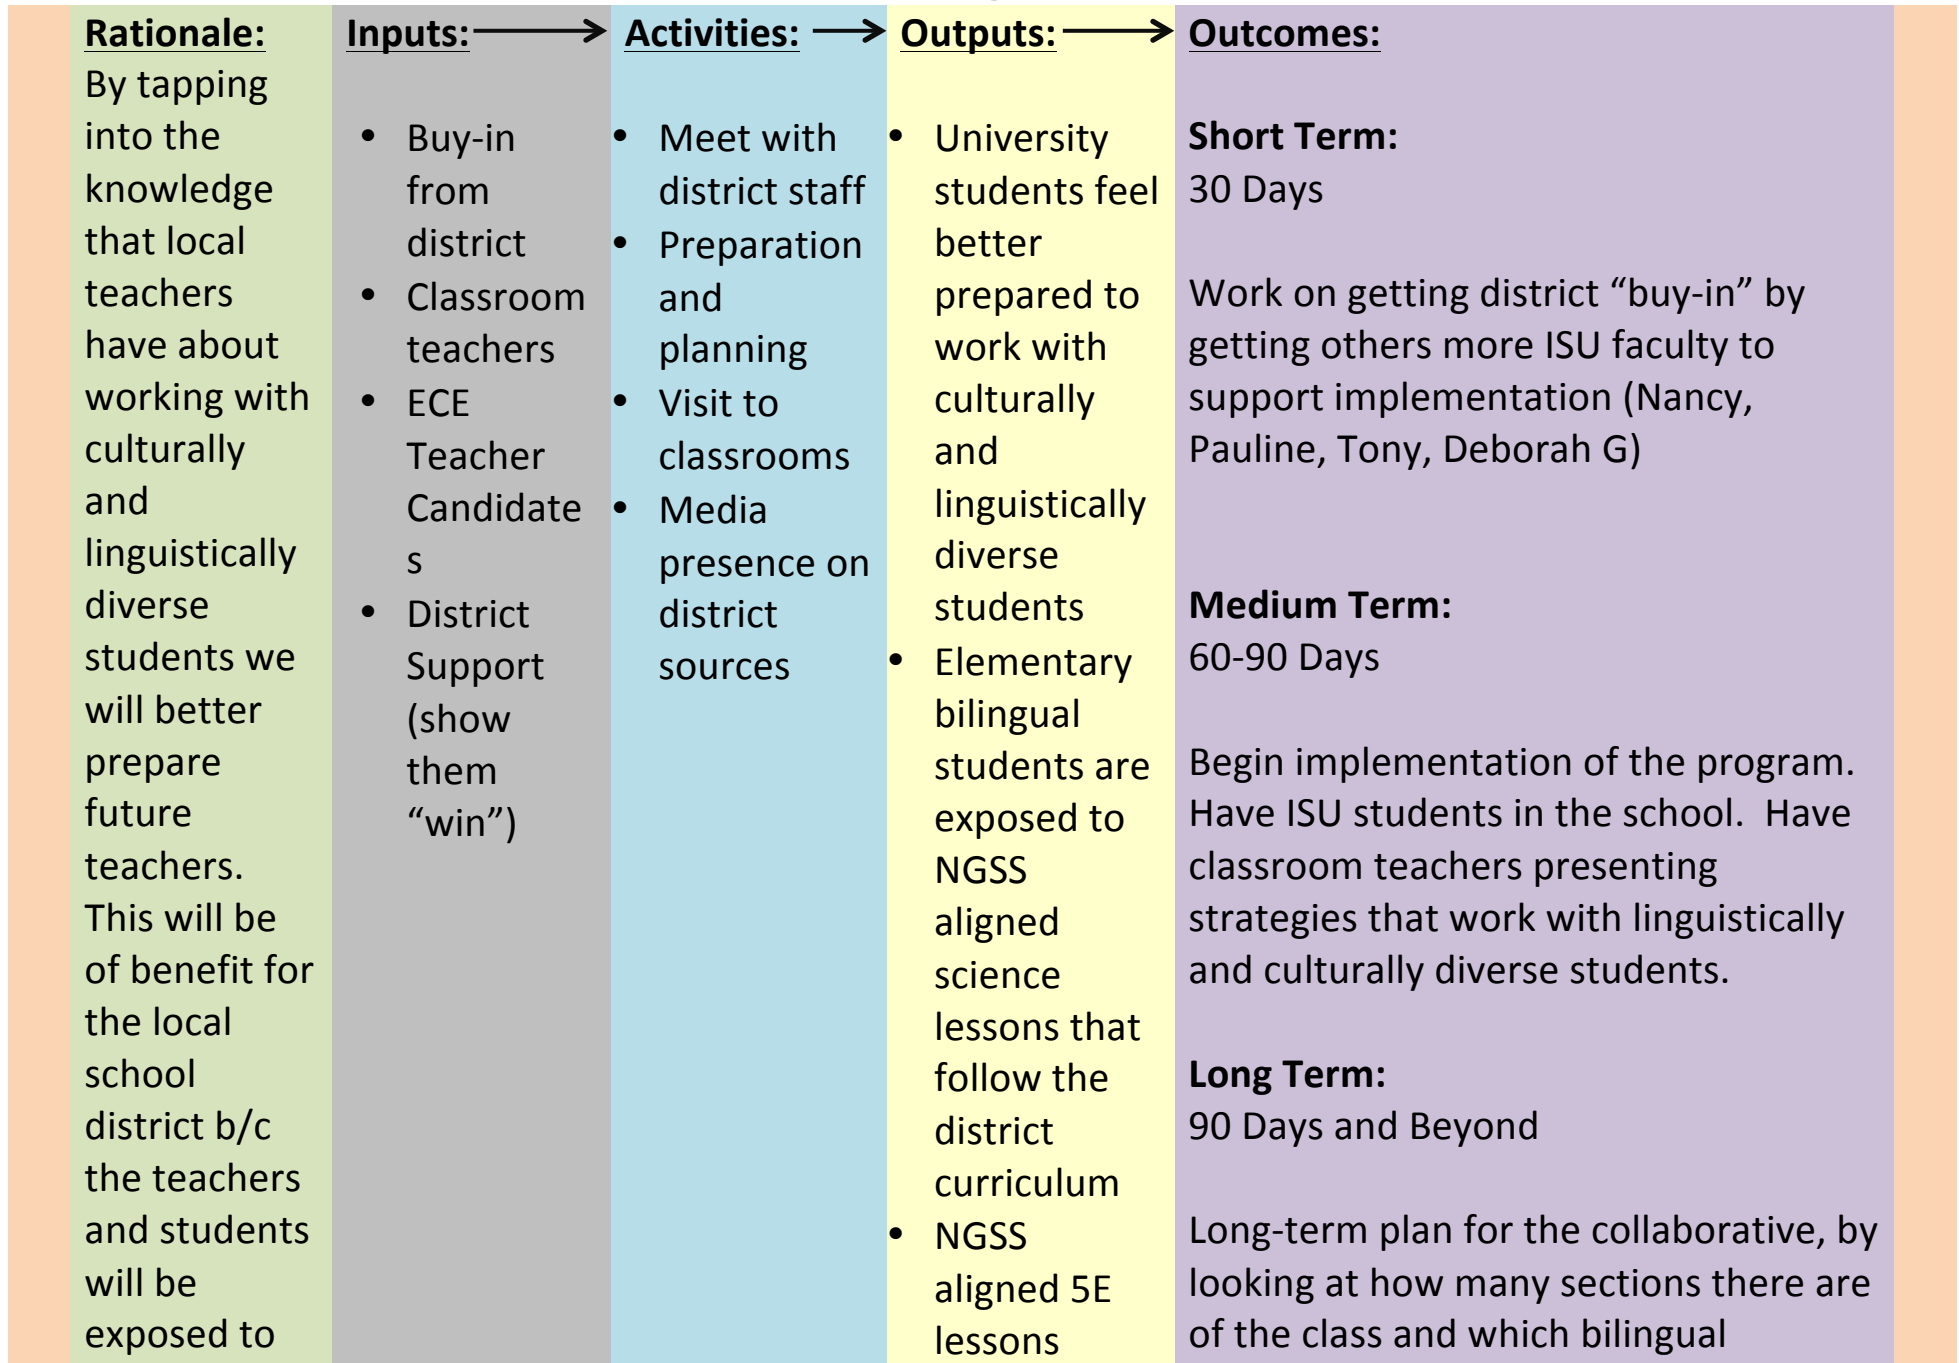

Stabilize the university-local school partnership where ECE science methods students go into local elementary bilingual classrooms for ½ hour a week.

**Goal:** What will be the impact if your idea is fully realized? ←

All ECE majors in the science methods course at ISU will spend part of their time in a local bilingual classroom in order to be better prepared to work with culturally and linguistically diverse student populations in their future classrooms.

NGSS-aligned science lessons. Science is the subject that is often ignored b/c of the push with common core for math and LA.

- ISU student reflective essays of what they have learned throughout the semester

classroom teachers would be willing to work with my students.

**External Environment:** What are the things beyond your control that will influence results?

The district may not be responsive to this new collaborative relationship between the school and the university.
