

Problem Statement: Equitable access for students is not a current reality because there is not a systemic teacher-principal leadership network on a state level to inform education policy and practice. To provide equitable access and increased student achievement for all students, If a teacher-principal statewide network provides a structure, support, and opportunities for teachers and principals to lead educational policy discourse, then student learning will increase due systems-level , cohesive and grounded conversations.

Goal: A statewide teacher-principal network will be created and will:

- 1. Engage in current College and Career Ready learning discussions**
- 2. Convene policymaker conversations;**
- 3. Develop and create teacher leadership skills models;**
- 4. Advise all education stakeholder groups**
- 5. Develop relationships with like-minded states to increase their own learning.**
- 6. Monitor and adjust as the work changes.**
