

Problem Statement: Addressing missing connections between parents and school: Focusing on the English Learner & Families of Poverty.

Goal: To establish meaningful connections between parent and school to improve student's attainment.

Rationale:

We all have concerns about the lack of parent involvement. This plan will allow the Kreitner Family to increase parent engagement and support student achievement.

Student Impact: (If..., then...) If the Kreitner Family can strengthen our home/school connections by getting parents involved and engaged in their child's learning, then students will realize their academic and personal potential, along with their civic value to the community.
